1807 Census

The following county census was discovered in 1962 by Esther Benzing, Butler County Archivist. This census return came only four years after Ohio became a state and represents a rare genealogical find since it precedes any State or Federal Census in Ohio. It is a census of the white male inhabitants over the age of 21 which names the heads of households and gives the number of the white males over the age of 21 in the household.
